

KISTI is a government-funded research institute designed to maximize the efficiency of science & technology and support high-tech R&D for researchers.

KISTI has laid a firm foundation for sophisticated R&D by collecting science & technology information from countries around the world and providing the information to companies and research institutes.

In addition, KISTI has provided a customized information analysis service to enable researchers and small & medium companies to make correct decisions on time and has contributed to maximizing research efficiency by building a world-class super computing and research network.

*We trust in Code\_Aster's ability for industry SME R&D.*

*We Interest in Code\_Aster's multi-physical functions.*

*We try to support industry SME R&D and make success story using Code\_Aster*

*Thank you.*
