

ZZZZ105 – Data-processing validation of law VISC_ENDO_LEMA

Summary:

This test does not have any physical meaning, it is primarily a data-processing test.
It aims to to cover part of the code related to the law of behavior `VISC_ENDO_LEMA`.

Modeling a:

- The negative value (not physics) of the parameter material `K_D` of `VISC_ENDO` allows to cover a routine which was not it.

This documentation is voluntarily brief.
