

ZZZZ227 – Validation of the creation of the map of temperature of reference

Summary:

This test does not have any physical meaning, it is primarily a data-processing test.

Modeling a:

- Creation of the map of temperature of reference in the presence of several materials by meshes
 - solver: MECA_STATIQUE
 - reference solution: even calculation with a material by meshes
- Validation of TEST_RESU on the cards
- Validation of the assembly of two cards (CREA_CHAMP/ASSE)

This documentation is voluntarily brief.
