

ZZZZ100 – Functions, tablecloths, formulas

Summary:

Modelings of this test validate the operation of the operators allowing the creation and handling of the functions, tablecloths and formula.

In particular, it is a question of testing the various possibilities of the orders `DEFI_FONCTION`, `DEFI_NAPPE`, `CALC_FONCTION`, `INFO_FONCTION`, `LIRE_FONCTION`, `IMPR_FONCTION`.

Other tests of the base check the good performance of these orders with physical values.

This documentation is voluntarily brief.
