

## ZZZZ103 - Impression of the digital constants depending on the platform

---

### Summary:

This command file makes it possible to print the values associated with the digital constants depending on the platform (32 or 64 bits). In particular lengths and extreme values of the integers and the floating numbers, some constant particular mathematics, and certain parameters related to the core use and of the files. The values are accessible using the functions `ENVIMA` described in the document [D6.01.01].

This documentation is voluntarily brief.
