

ZZZZ381 – Validation of the concepts using the multifibre structure of data

Summary:

The goal is to validate the orders which produce and use directly or indirectly the multifibre structure of data. This structure is produced by the order `DEFI_GEOM_FIBRE`. The concepts produced by the following orders are tested: `CREA_MALLAGE`, `AFFE_CARA_ELEM`, `DEFI_COMPOR`, `AFFE_MATERIAU`.

This documentation is voluntarily brief.
